# How to connect a
VEWsmart
## device with Amazon Alexa

**1.** Ensure the **light is switched off**.

2. Open the **Alexa app**.

**3.** Click the **settings** icon at the bottom right of the screen.

**4.** Click the **plus** at the top right of the screen.
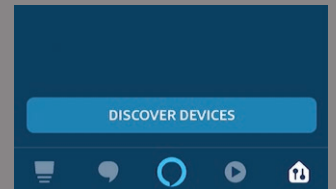

5. Click '**add device**'.

**6.** Select '**light**'.

7. Scroll to the bottom of the list and select '**other**'.
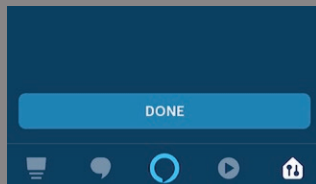

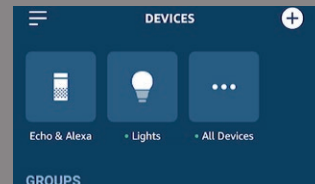

8. Select connection method (Zigbee)

9. Click '**discover devices**' then immediately switch the light on.
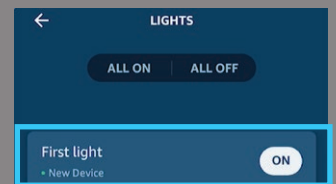

10. Wait until the screen says '**1 light is discovered**'.
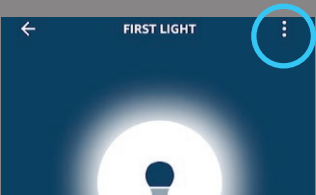

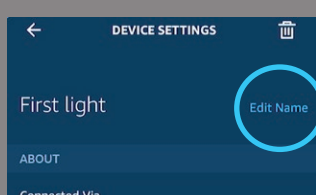

11. Click '**done**'.

12. The device will now show under the 'lights' category. **Click on the icon with the bulb**
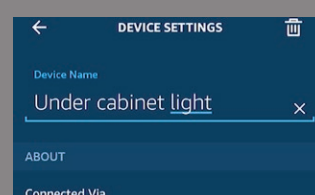

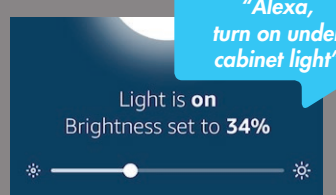

13. Click on the new light names '**first light**'.

14. Click the 3 dots at the top right of the screen.

15. Click '**edit name**'.

16. **Name the light** whatever you like, for example 'under cabinet lights' or 'plinth lights'.

17. **Test the functions**, via the app and by using voice commands, referring to the light as name in previous step.

"Alexa, turn on under cabinet light"
