

Code: N28-1003

Product Name: WIRELESS SENSWITCH PIR SENSOR SWITCH

Description

The Wireless PIR Sensor operates using 2.4GHz wireless radio frequency technology. It can be paired with the receiver to enable wireless lighting control for furniture and cabinet applications.

Product Details

Product Type: Sensor

Product Description: Ambient Temperature -20°C to 50°C
 Operating Voltage 3.0V to 3.3V Battery Type CR2450 (Last approx. 12 month)
 When the battery is replaced the sensor will need relinking to the receiver (See instructions) Modulation Method GFSK
 Standby Power Consumption $\leq 0.2\text{mW}$
 Operating Power Consumption $\leq 60\text{mW}$
 Wireless Transmission Frequency 2.4GHz
 PIR Sensing Distance 1-3m

Max Load Power: 12v - 60w

Receiver to Sensor Range: Up to 10 metres

Specification

Dimensions:

50 x 40 11.5mm
