INSPIRING LIGHTING

TLW

THINK lighting, **THINK** TLW

TLW | The Lightworks is part of a vibrant family owned business which was established over 50 years ago. Since 1996 it has progressed into a leading manufacturer and supplier of innovative LED lighting which is distributed to the trade.

Specific attention is given to the KBB and furniture areas but almost any lighting product can be competitively sourced, packaged and supplied. The company continues to extend its own range of products and provides high quality lighting solutions across many sectors.

Many market-leading brands are now illuminated by our products across the world and our current client base includes some of the largest manufacturers of fitted furniture. If you're not already working with us, a warm welcome awaits and we'd love you to be a part of our continued success.

Introducing **vev** INSPIRING LIGHTING

See us in a different light

As part of our ongoing strategy to raise awareness of our products and services, we have introduced a new brand name '**VEV**'.

The VEV branding is all about simplicity and ease of use thanks to an in-depth understanding of our product range and our customers' requirements. In essence, we make it easy for you to specify our lighting.

When it comes to lighting there is a big difference between 'well lit' and 'lit well' and our team will collaborate with you to offer a solution based proposal that will add real tangible value to your business.

With our range of products and expertise, TLW will ensure you always achieve the desired effect.

Discover more at **the-lightworks.com**

Please use our colour coded symbols to assist in making sure you are selecting compatible items which are suitable for each other or the room they are being installed in.

VEW tailored solutions

At TLW | The Lightworks we have the ability to service OEM clients with designated warehouse space available for stock holding and call off requirements to help seamless 'just in time' manufacturing processes.

We have also developed an exceptional bespoke service where we will make up aluminium profile and LED tape to your exact requirements. This not only saves on your labour costs and inevitable material wastage, but gives you more time to look after your customers.

Customise your VEW

Looking for something a bit different? We are proud to offer a free consultation and quotation for your individual lighting requirements where we can bring your illuminating ideas to light. Please do not hesitate to contact the TLW team if you would like to discuss your needs in more detail.

1

Choose your aluminium profile

2

Choose your LED tape

3

Email your plans to us and we will provide a competitive quote

4

Receive a simple plug and play system made specifically to your needs

KONNEX SYSTEM

Installing cabinet lighting just got a whole lot easier with our new, simple KONNEX plug and play system. KONNEX has been designed to alleviate stress and reduce installation times and has already proved to be a hit with many electricians who have praised the system.

We believe the KONNEX system is a huge help when installing our VEW range of lighting to your customer's kitchen, bathroom or bathroom - after all, it just KONNEX!

Smart home technology

App based lighting adds real value to the consumer as they can control their lighting via a smartphone or tablet from wherever they are in the house. This technology has positively impacted the growing IoT revolution and we are pleased to offer a range of products to fit the lifestyle of your customers.

COB Technology

COB (chip-on-board) LED technology simply combines many small chips that are integrated into one large chip and bonded directly on to a substrate. This allows for increased heat dissipation which increases the life span of the fitting.

Key features:

- Higher light levels with a uniform appearance
- Good levels of light dispersion
- Increased stability and reliability
- Improved heat management improves longevity

Recessed only

KONNEX SYSTEM

Installing cabinet lighting just got a whole lot easier with our new, simple KONNEX plug and play system. KONNEX has been designed to alleviate stress and reduce installation times and has already proved to be a hit with many electricians who have praised the system.

We believe the KONNEX system is a huge help when installing our VEW range of lighting to your customer's kitchen, bathroom or bathroom - after all, it just KONNEX!

Key features:

- Separate power lead makes it easier to route from power source to the fitting
- Simply unplug the lead from the fitting if your customer wants to change the light
- Individual components allows for easier troubleshooting
- Available throughout the VEW range except LED tape

SMD Technology

SMD technology, short for surface mounted diode, is LEDs that have been mounted on an aluminium substrate and enveloped in an epoxy resin. It is a self-contained surface-mount LED device designed either to function on its own or to plug into a compatible unit.

Key features:

- Offers a higher lumen output for a lower energy consumption
- Longer lifespan than standard LEDs
- Wider beam angle for increased spread of light
- Lower energy costs with a high level of performance

Colour Changing Temperature

Our colour selectable cabinet light is simply three lights rolled into one. A simple flick of a switch at the rear of the fitting gives you the choice of a warm white (3000K), natural white (4000K) or daylight (6000K) colour temperature.

Based on the popular Star cabinet light (K01-0130*), the Tri-Star also features the KONNEX simple plug and play system for simple installation. Having just one SKU for a cabinet light and only one fitting to keep in stock are two key benefits that the Tri-Star can offer KBB retailers.

KONNEX SYSTEM

Installing cabinet lighting just got a whole lot easier with our new, simple KONNEX plug and play system. KONNEX has been designed to alleviate stress and reduce installation times and has already proved to be a hit with many electricians who have praised the system.

We believe the KONNEX system is a huge help when installing our VEW range of lighting to your customer's kitchen, bathroom or bathroom - after all, it just KONNEX!

Key features:

- Separate power lead makes it easier to route from power source to the fitting
- Simply unplug the lead from the fitting if your customer wants to change the light
- Individual components allows for easier troubleshooting
- Available throughout the VEW range except LED tape

The logo consists of a blue square with a white triangle pointing downwards, and the letters 'TLW' in white.

Bathroom & ACCESSORIES

The logo features the word 'view' in a large, white, lowercase sans-serif font. Above the 'v' is a white triangle pointing downwards. Below 'view' is the phrase 'INSPIRING LIGHTING' in a smaller, white, uppercase sans-serif font.

IP RATINGS EXPLAINED

'IP' (INGRESS PROTECTION) RATING

FIRST DIGIT: Protection against ingress of foreign bodies e.g. tools, dust, fingers, etc.

SECOND DIGIT: Protection against ingress of liquids i.e. IP44 is protection against solid objects greater than 1mm and water sprayed from all directions.

FOREIGN BODIES

FIRST DIGIT

0	No protection
1	Protected against solid objects greater than 50mm (e.g. accidental touch by hands)
2	Protected against solid objects up to 12mm (e.g. fingers)
3	Protected against solid objects greater than 2.5mm (e.g. tools and wires)
4	Protected against solid objects greater than 1mm (e.g. small tools and wires)
5	Protected against dust, limited ingress (e.g. no harmful deposit)
6	Totally protected against dust

LIQUIDS

SECOND DIGIT

0	No protection
1	Protection against vertically falling drops of water (e.g. condensation)
2	Protection against direct sprays of water up to 15 degrees from vertical
3	Protection against direct sprays of water up to 60 degrees from vertical
4	Protection against water sprayed from all directions – limited ingress permitted
5	Protected against low pressure jets of water from all directions – limited ingress permitted
6	Protected against high pressure jets of water (use on ship deck) – limited ingress permitted
7	Protected against the effects of immersion between 15cm and 1m
8	Protected against long periods of immersion under pressure

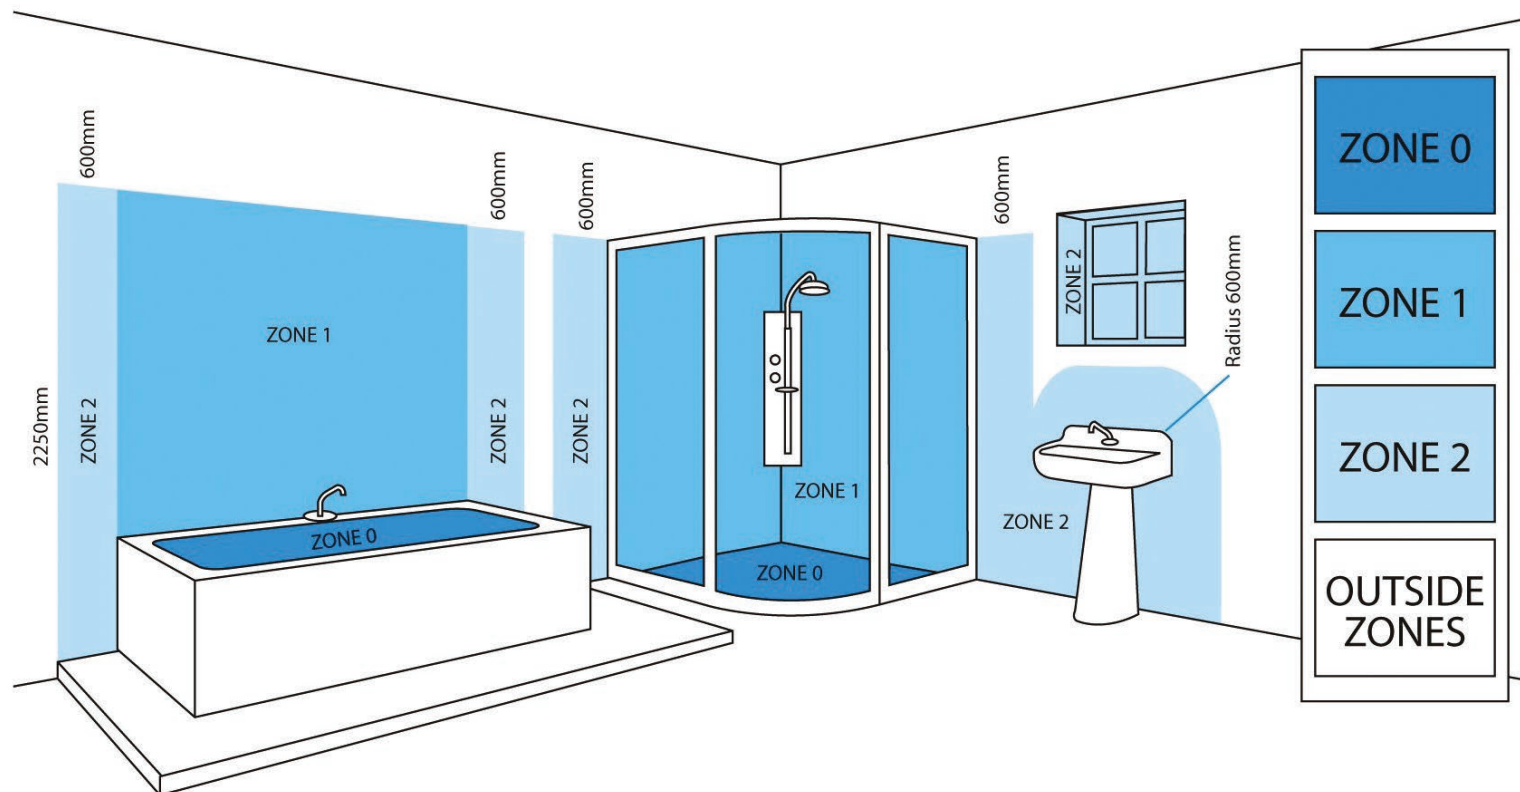

IP ZONES

ZONE 0 Inside the bath or shower. Any fittings used here must be SELV (max. 12v). A minimum rating of IPx7 is required here.

ZONE 1 Above the bath to a height of 2.25m. A minimum rating of IPx4 is required here.

ZONE 2 The area stretching to 0.6m outside the bath and above the bath if over 2.25m. An IP rating of at least IPx4 is required here.

This information is intended as a guide and contains several generalisations for illustrative purposes. For more technical information refer to an electrician and specific product data.

IP65 GU10/LV

- Aluminium backed lamps NOT required
- Supplied with GU10 & LV lamp holders
- Extra large terminals for fast loop in loop out wiring
- Will accept some GU10 CFL and LED lamps
- Tested to Building Regulations Parts B, C, E and L
- Open cage fitting allows for lamp to breathe and not overheat
- GU10 CFL/LED fittings have a spring-loaded GU10 lamp holder for ease of lamp change
- Needs lamp and or transformer/driver
- Overall diameter: 108mm

A12-6275*

IP65 Mains Contractor Downlight

*Finish: White (WH), Polished Chrome (PC), Satin Nickel (SN)

- Spring loaded connector blocks
- IP65 rated
- Integrated fire and acoustic barrier
- Part 'C' compliant, Part 'E' compliant
- Die-cast bevel
- Overall diameter: 83mm
- Full 90 minutes fire rated

A20-3628

Downlight Fixed Fire Rated IC Cap (ICCAP)

- Compatible with A12-6275*
- Complies with new building regulations

D02-3551

Tahiti LED Drum Ceiling Fitting 18w

- Surface mounted
- 18w SMD LED
- Chrome finish with white glass shade
- Ø290 x H70mm

D02-3552

Cayman LED Circular Ceiling Fitting 12w

- Surface mounted
- 12w SMD LED
- Chrome finish with white glass shade
- Ø260 x H100mm

A12-6255*

IP65 Mains Shower Light

*Finish: White (WH), Polished Chrome (PC), Nickel Matt (NM)

- Die-cast aluminium
- The lamp sits close to the lens enabling a wider beam angle
- Max wattage: 35w
- Overall diameter: 82mm

'Collectively Transforming Spaces'

TLW | The Lightworks is part of a group of companies that have been experts in transforming the appearance of a space since our inception in 1966.

Our high quality seating, staging and lighting products have been installed in all four corners of the world in many landmark buildings and we're both very proud and privileged to have worked with some of the world's largest organisations.

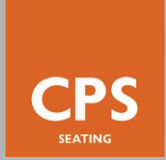

The business model we work towards is based on a quality approach to everything we do on a daily basis. Meticulous attention to detail is given to every stage of a project from the initial enquiry to the finished product going out of the door with line managers responsible for every department.

Our freehold 2.5 acre site is well-equipped to aid the foreseeable future growth plans and is located just off the A1, south of Doncaster, for ease of access by road, rail or air. The purpose designed premises

with dedicated office, conference, production and warehousing facilities gives us the capacity to efficiently handle any sized project.

Our faithful members of staff live and breathe our mission, vision, values and culture statements. The oldest member of the team has now worked for the family for over 50 years and many others are closely linked and driven by the same dedication and loyalty.

A warm welcome is extended should you wish to visit us and meet the team that will handle your project in confidence. Alternatively, one of our highly knowledgeable representatives will gladly meet with you to discuss over your requirements in detail.
