

Linking lights to an Amazon Alexa using the

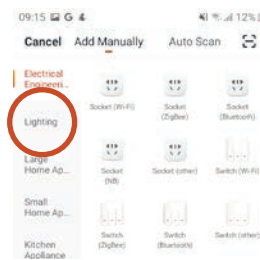

VEWsmart app

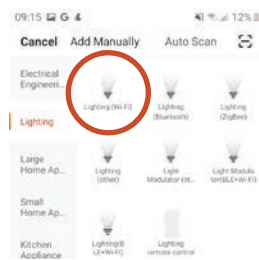

1 Open the VEWsmart app.

2 Click the plus icon at the top right hand of the screen.

3 Click the lighting tab.

4 Click 'lighting Wi-Fi'.

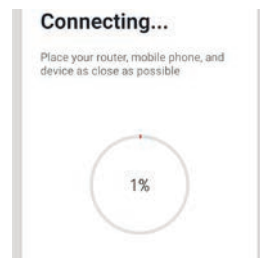

5 Follow the steps displayed on the screen.

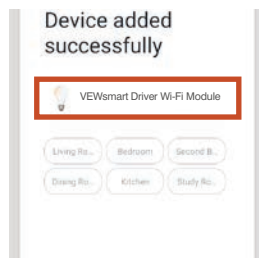

6 Click 'Confirm indicator rapidly blink'.

7 Select your Wi-Fi.

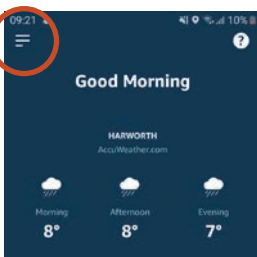

8 Allow time for the App to link to the light.

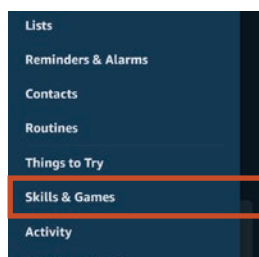

9 Rename your light by clicking on the text to the right of the bulb icon. Click 'done'.

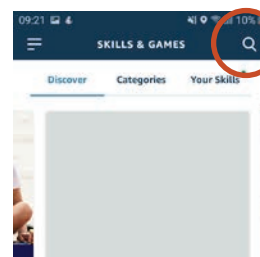

10 Open the Amazon Alexa app.

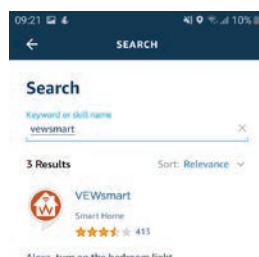

11 Click on the menu icon at the top left hand of the screen.

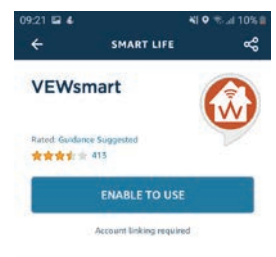

12 Click 'skills & games'.

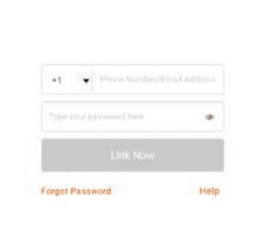

13 Click the search icon at the top right hand of the screen.

14 Type 'VEWsmart' into the search bar. Select VEWsmart.

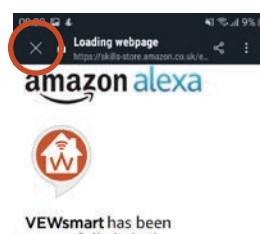

15 Click 'enable to use'.

17 Log in to your VEWsmart account

18 Click 'Authorise'.

19 Your account is now linked. Click the cross on the top left hand of the screen.

20 Click 'discover devices'.
