TLW

WHEN **LIGHT** BECOMES ART

VEW

EXPLORE LIGHTING

Lighting can reshape even the simplest of spaces with minimal cost. As technology has evolved, lighting can now visually elevate a space and increase its value simultaneously, creating a more rounded attractive range of installations for your customers.

INSPIRE

Illuminate your imagination and push the boundaries to create innovatively lit spaces.
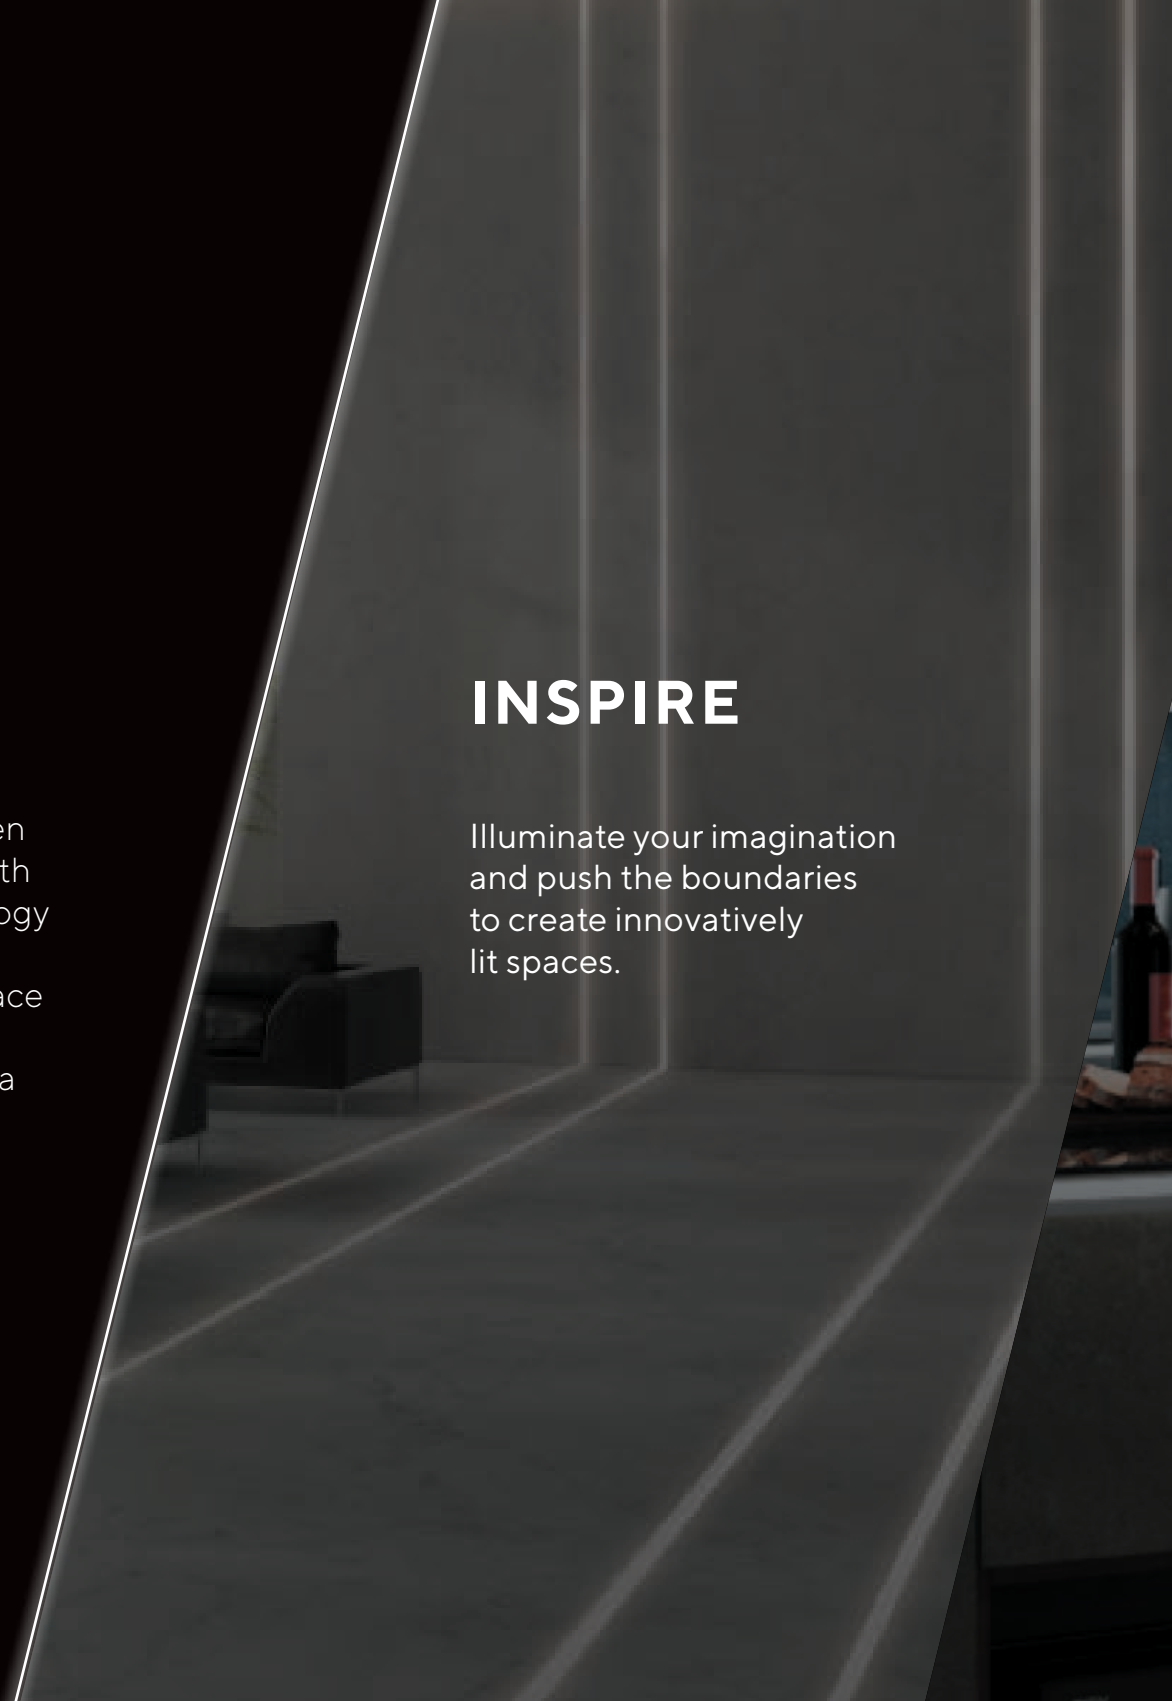

INTEGRATE

Bring your ideas to life, there's no limit to where light can shine.

ENLIGHTEN

Transform your customers' interiors and change the way they experience light forever.

VEW LIGHTING

BRANDS

VEWtube™

VEWtube is our LED lighting video platform on YouTube. We publish lighting guides, product overviews and exclusive offers.

VEWhome™

Illuminate your home spaces with VEWhome. More information on VEWhome is coming soon.

VEWsmart™

VEWsmart is our smart lighting offering that can also integrate with your Google Home, Amazon Alexa and Apple Home.

VEWacademy™

The VEWacademy is the culmination of TLW's specialist knowledge and passion to help others to get the best from our lighting.

The VEWacademy is exclusively for our trade customers.

veWmirrors™

YOUR MIRROR**,** **YOUR** WAY

VEWmirrors is a contract and project mirror offering from TLW and this will involve minimum order quantities of at least 10.

Many projects have been successfully completed with apartment developers, housebuilders, hotels, university student accommodations and retirement homes.

Bespoke LED Mirrors
We have the ability to design, manufacture and deliver mirrors according to the project requirements.

Our manufacturing, warehouse and logistic operations are fully geared up for large volumes and call off orders, delivered direct to site by our own delivery fleet of vehicles ensuring consistency, reliability and that your project keeps to schedule.

Our loyal staff live and breath the company mission, vision, values and culture statements. We stand for loyalty, honesty, efficiency and service. If you're not already working with us, a warm welcome awaits and we'd love for you to be a part of our continued success.

For more information about our range of VEWmirrors products please contact our team of specialists.

VEW LIGHTING

veWcustom™

YOUR LIGHTING, **YOUR** WAY

A one stop supply for your lighting requirements. This saves you the hassle of procuring lighting components from multiple suppliers.

Pre-assembled products, meaning:
- LED strip and profile is supplied as built up units, saving you preparation and installation time
- Product wastage and damages are eliminated/significantly reduced
- Supplied in kit format per layout, fully labelled and with LED drivers, making it hassle free and easy for the installation teams

Flexible delivery options:
- Cut down on your stock holding/inventory
- Ability to deliver to a predetermined call off schedule
- Direct to site deliveries available if required

1. Select your LED tape and profile
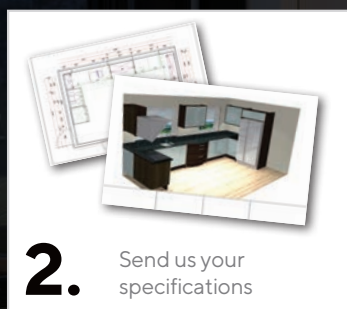

2. Send us your specifications

3. We will provide a competitive quote for kit format or individual lengths

VEWcustom can provide the LED lighting solutions you need quickly and easily tailor made for your business's needs and requirements. Please contact our team of specialists.

Please use our colour-coded icons to assist in making sure you are selecting compatible items for the area you wish to install a product. Please feel free to discuss by calling the team on +44(0)1302 741941

Ordering

Here at TLW we are making ordering even easier.

Here is an example of a VEW product: Galaxy Cabinet Light.

The * at the end of the product code indicates that you have options. These are listed below the product code and are broken down into steps. In this example, STEP 1 asks you to select the finish, then STEP 2 shows the available colour temperatures. Simply take the product code and add the letters from the options you require to create the product code you will need for ordering.

For example:
K01-0100PCNW = Finished in Polished Chrome with Natural White colour LED.

K01-0100SSD = Finished in Stainless Steel with Daylight colour LED.

Galaxy
IP44 LED Cabinet Light 2.6w
K01-0100*

***STEP 1** Select Finish	SS	PC	
***STEP 2** Select Colour Temp	WW	NW	D

KEY: Warm White (WW) | Natural White (NW) | Daylight (D) | Stainless Steel (SS) | Polished Chrome (PC)

SMD Technology

SMD

SMD, or 'Surface Mounted Diode' LED products contain a permanently fused LED chip on a printed circuit board. This is then enveloped in an epoxy resin.

Key features:

- Good light output with low energy consumption
- Long lifespan
- Wide beam angle for increased spread of light
- Lower energy costs with a high level of performance

COB Technology

COB

COB or "Chip on Board" technology contains a high number of diodes on the same surface, making it extremely bright but keeping the energy consumption very low. It also a high lumen-per-watt ration and heat efficiency.

Key features:

- Very high light output with low energy consumption
- Wide beam angle for increased spread of light
- Long lifespan
- Highly diffused light
- Minimal heat output

Changeable Colour Temperature

CCT SWITCHABLE   **CCT ADJUSTABLE**

CCT stands for 'correlative colour temperature' which indicates the colour appearance of a white LED. Is it defined in Kelvins.

What are CCT switchable products? When a product is CCT switchable, this means that it can be controlled to be 3000K warm white, 4000K natural white or 6000K daylight.

What are CCT adjustable products? CCT adjustable products can be transitioned from 3000K warm white through to 6000K daylight or anything in between with the use of a remote control or a mobile device application.

RGB

RGB

Our RGB products allow you to select a light colour from every colour in the rainbow. This effect is stylish, versatile and highly relaxing!

KONNEX SYSTEM

Installing cabinet lighting is a whole lot easier with our simple KONNEX plug and play system. KONNEX has been designed to alleviate stress and reduce installation times and has already proved to be a hit with many electricians who have praised the system.

We believe the KONNEX system is a huge help when installing our VEW range of lighting to your customer's kitchen, bedroom and bathroom – after all, it just KONNEX!

Key features:

- Separate power lead makes it easier to route from power source to the fitting
- Simply unplug the lead from the fitting if your customer wants to change the light
- Individual components allows for easier troubleshooting
- Available throughout the VEW range

VEW LIGHTING

vevvsmart™

Our system uses WIFI or Zigbee 3.0 technology which is recognised as one of the safest and most secure systems to connect up your home. You can connect via the VEWsmart APP, Alexa*, Philips Hue* and to Google Home and Siri via account linking.

K30-2041*Z

Wireless Hub

Zigbee 3.0 Wireless & Bluetooth Hub

Code: K30-2072Z

- **Connect to Zigbee and Bluetooth products**
- Supports up to 128 units
- Zigbee 3.0 protocol
- DC 5V ⎓1A input voltage
- 10-35 metres connection range
- Comes with 1 x USB lead

ETL Driver

15w LED Driver
K10-1215

- Dimensions: L139 x W48 x D12mm

36w LED Driver
K10-1236

- Dimensions: L192 x W52 x D20mm

60w LED Driver
K10-1260

- Dimensions: L211 x W52 x D22mm

- 110v – 240V
- 50/60Hz
- ETL & FCC approved
- Suitable for the US market
- Can be used as a standard driver, but to make this smart please add control module K30-2042 (below)

MICRO

Control Module

Code: K30-2042*

- **Upgrades your LED driver to Smart enabled**
- Comes complete with a 200mm lead
- Ability to connect up to 3 Drivers to be smart controlled
- *WIFI or Zigbee connectivity available
- Hub only required if Zigbee control module ordered
- Works with the VEWsmart APP to connect to any Alexa/Google Home device
- Can be retro fitted to the LED Drivers K10-1215, K10-1236 & K10-1260
- Dimensions: L56 x W41 x D12mm

OPTIONS AVAILABLE

📶 *WiFi (WI)

Z *Zigbee (Z)

Control Lead

Code: R90-0173

- 2mtr connection lead
- Works with LED Drivers K10-1215, K10-1236 & K10-1260 to connect to the K30-2042 control module

VEWSmart

IP65 SMD Fixed Dimmable CCT LED Ceiling Light 6w

Code: K05-6064MWCCT-WI

- Control your ceiling light using Alexa or VEWsmart app
- 6W
- 220-240V
- Fire rated to 30/60/90 mins. Tested to SGS
- Dimmable
- CCT – 3000K to 4000K
- 50,000 hours LED life
- Lumens – 550 – 600
- Beam angle – 38°
- CRI >80
- Dimensions: H500 x D90mm

| SMD | 68mm | 50mm | IP65 | CCT ADJUSTABLE |

Smart LED Lamps

Pear Filament 6w CCT Dimmable Smart LED Lamp E27

Code: K13-0070CCT-WI

- 6w LED
- 220-240V
- Amber coloured finish
- CCT Dimmable
- Filament
- 600 lumens

| W | CCT |

Smart LED Lamps

Globe Filament 6w CCT Dimmable Smart LED Lamp E27

Code: K13-0071CCT-WI

- 6w LED
- 220-240V
- Amber coloured finish
- CCT Dimmable
- Filament
- 600 lumens

| W | CCT |

Smart Driver 15w
12v LED Smart Driver 15w with 6-Port Micro Plug Connector

Code: K10-1220Z

- Max 15w
- Zigbee
- Rated input voltage: 200-240AC
- 2m mains cable
- Dimensions: L103 x W35 x H16mm

Smart Driver 30w
12v LED Smart Driver 30w with 6-Port Micro Plug Connector

Code: K10-1230Z

- Max 30w
- Zigbee
- Rated input voltage: 200-240AC
- 2m mains cable
- Dimensions: L150 x W45 x H17mm

Smart Driver 50w
12v LED Smart Driver 50w with 6-Port Micro Plug Connector
Code: K10-1250Z

- Max 50w
- Zigbee
- Rated input voltage: 200-240AC
- 2m mains cable
- Dimensions: L180 x W65 x H32mm

Single Colour Dimming Remote Receiver
Code: K30-2037ZU

- **Switch and dim single colour LED tape**

- 12-36VDC,1 channel, 8A per channel

- For single colour control

- Zigbee slave/Zigbee mesh network

- Up to 288w

- Both receiver and repeater function

- To be used with K30-2038SCZ and K30-2034Z

UNI MICRO HUB

5-In-1 Dimming Remote Receiver
Code: K30-2041*Z

- **Controls and dims single colour, CCT, RGB, RGBW and RGB+CCT lights**

- 4 in 1 Zigbee 3.0 dimmer

- 12-24VDC, 5 channels, 4A per channel

- Dimmable

- Choose between single colour, CCT, RGB, RGBW or RGB+CCT control

- Zigbee mesh network

- Both receiver and repeater function

UNI RGB CCT HUB

Smart Converter
Zigbee Triac Dimmable Converter 2 Channel

Code: K30-2060Z

- **Converts your traditional switch or dimmer to smart enabled**
- AC triac dimmable converter works with or without neutral wire
- 100-240VAC Zigbee + PUSH AC phase cut dimmer
- Trailing edge and lead edge dimming
- Single wire push switch input for push dim function
- Dim and switch single colour dimmable LED bulbs, traditional halogen lights and incandescent lights

Switch Single
Single Colour 1 Zone Dimming Wall Switch

Code: K30-2061Z

- **Controls and dims single colour lights in one zone**
- 1 zone
- Battery-free, wireless kinetic switch
- Can connect to either the driver or receiver directly (K10-1220Z, K10-1230Z, K10-1250Z, K30-2037ZU, K30-2041SCZ)
- For single colour light control
- Can be surface mounted using 3M VHB adhesive pads or to a standard back box or pattress with the screws supplied
- Dimming range: 0.1-100%

Switch Double
Single Colour 12

Code: K30-2062Z

- **Controls and dims single colour lights in two zone**
- 2 zones
- Battery-free, wireless kinetic switch
- Can connect to either the driver or receiver directly (K10-1220Z, K10-1230Z, K10-1250Z, K30-2037ZU, K30-2041SCZ)
- For single colour light control
- Can be surface mounted using 3M VHB adhesive pads or to a standard back box or pattress with the screws supplied
- Dimming range: 0.1-100%

Bypass For K30-2060 - Wattage Below 3W

Code: K30-2060B

- Works with K30-2060Z
- Prevents flickering of connected lights
- In 2-wire connection
- Bypass allows to reduce minimum power of load required by the dimmer for correct operation
- This is needed if wattage is below 3W

Switch CCT
CCT 1 Zone Dimming Wall Switch

Code: K30-2063Z

- **Controls and dims CCT lights in one zone**
- 1 zone
- Battery-free, wireless kinetic switch
- Can connect to the receiver directly (K30-2041CCTZ)
- For CCT light control
- Can be surface mounted using 3M VHB adhesive pads or to a standard back box or pattress with the screws supplied
- Dimming range: 0.1-100%

Switch Multi
CCT & RGB & RGB+CCT 1 Zone Dimming Wall Switch

Code: K30-2064Z

- **Controls and dims CCT, RGB or RGB+CCT lights in 1 zone**
- 1 zone
- Battery-free, wireless kinetic switch
- Can connect to the receiver directly (K30-2041RGBCCTZ)
- For single colour, CCT, RGB and RGB+CCT light control
- Can be surface mounted using 3M VHB adhesive pads or to a standard back box or pattress with the screws supplied
- Dimming range: 0.1-100%

Remote Single
Single LED Dimming Zigbee Remote

Code: K30-2034Z

- **Zigbee remote for single colour control**
- Multi-zone remote control
- Up to 30m range
- 4.5VDC by 3xAAA battery
- Up to 4 zones
- Up to 3 different scenes for each zone
- To be used with K30-2037ZU or K30-2041SCZ

Remote CCT
CCT LED Dimming Zigbee Remote

Code: K30-2034CCT

- **Zigbee remote for CCT control**
- Multi-zone remote control
- Up to 30m range
- 4.5VDC by 3xAAA battery
- Up to 4 zones
- Up to 3 different scenes for each zone
- To be used with K30-2041CCTZ

CCT ADJUSTABLE

Remote RGB
RGB LED Dimming Zigbee Remote

Code: K30-2035Z

Zigbee remote for RGBW control
- Multi-zone remote control
- Up to 30m range
- 4.5VDC by 3xAAA battery
- Up to 4 zones
- Up to 3 different scenes for each zone
- To be used with K30-2041RGBZ

RGB

Remote Multi
Dot Multi-Channel LED Dimming Zigbee Remote

Code: K30-2034MZ

- **Zigbee remote switch with dimming control option and CCT/RGB control**
- Multi-zone remote control
- Up to 30m range
- 4.5VDC by 3xAAA battery
- Up to 4 zones
- Up to 3 different scenes for each zone
- To be used with K30-2041CCTZ, K30-2041RGBZ or K30-2041RGBCCTZ

RGB   **CCT**

Swipe Single
Single Colour LED Dimming Zigbee Wall Switch

Code: K30-2038SCZ

- **Controls and dims single colour lights**
- 100-240VAC EU Zigbee panel for single colour
- 25%, 50%, 75% and 100% brightness
- Up to 4 zones
- Dimming range: 0.1-100%
- To be used with K30-2037ZU or K30-2041SCZ

Swipe CCT
CCT LED Dimming Zigbee Wall Switch

Code: K30-2038CCT

- **Controls and dims CCT lights**
- 100-240VAC EU Zigbee panel for CCT colour
- 25%, 50%, 75% and 100% brightness
- Up to 4 zones
- To be used with K30-2041CCTZ

CCT ADJUSTABLE

Swipe RGB
RGB LED Dimming Zigbee Wall Switch

Code: K30-2038RGBZ

- **Controls and dims RGB lights**
- 100-240VAC Zigbee touch panel for RGBW control
- Up to 4 zones
- Glass touch panel
- To be used with K30-2041RGBZ

RGB

Remote Ultra
Ultra RGB+CCT LED Dimming Zigbee Remote

Code: K30-2052Z

- **Zigbee multi zone remote control for RGB and CCT**
- 4 zones Zigbee 5 channel remote
- For single colour, CCT, RGB/RGBW, CCT + RGB remote all in 1
- Zigbee hand remote
- 3VDC
- Dimming range: 0.1-100%
- To be used with K30-2041RGBCCTZ
RGB   **CCT** ADJUSTABLE

Mirror Touch
Mirror Touch Sensor

Code: N28-0007

- **Touch activated sensor for use with mirror lighting**
- Invisible switching solution – install behind the mirror surface
- 3M mounting
- Max load power: 12v-60w
- Max load power: 12v – 60w
- Cable length: 1500mm
- Dimensions: L52 x W32 x D6mm
- Switches on 12v side so suitable for 12v lighting

MICRO

Syno PIR
PIR Sensor Switch with Remote Sensor

Code: N28-0181

- **Motion activated**
- Automatically switches light off when no motion is detected
- Automatically turns off after 10-30 seconds of no motion. Length of time is adjustable
- Switches on the mains side (240V)
- Detection range: 2-5m
- Input: 100-240V
- Recess mounted
- Max load power: 250w
- 1.5m sensor cable
- Dimensions: L85 x W35 x H18mm

20mm

Syno IR
IR Sensor with Remote Sensor

Code: N28-0188

- **Wave activated**
- Switches on the mains side (240V)
- Detection range: 50mm
- Input: 100-240V
- Recess mounted
- Max load power: 250w
- 2m sensor cable
- Dimensions: L76 x W36 x H19mm

13mm

SenSwitch PIR
PIR Sensor Switch

Code: K30-2011SC-BAT

- **Controls single colour lights**
- Single-zone remote
- Runs up to 216w at 12v
- On/off function
- Dimming and brightness levels

MICRO **UNI**

SenSwitch PIR
PIR Sensor Switch

Code: K30-2011CCT-BAT

- **Controls CCT lights**
- Single-zone remote
- Runs up to 144w at 12v
- On/off function
- Adjustable dimming and brightness levels

UNI **CCT**

SenSwitch PIR
PIR Sensor Switch

Code: K30-2011CCT-BAT

- **Controls RGB lights**
- Single-zone remote
- Runs up to 216w at 12v
- On/off function
- Adjustable dimming and brightness levels

UNI **RGB**

LIGHTING TEMPERATURES

At TLW we understand how important it is to get lighting absolutely perfect, that's why most VEW products come in different colour temperatures to ensure that every style and preference is catered for. The three colour temperatures we manufacture are 3000K warm white, 4000K natural white and 6000K daylight. Each temperature creates an entirely different finish on the overall look of a room as you can see; warm white is soft and cosy, natural white is pure, clean and versatile and daylight is fresh and modern.

Some products are available in CCT colour temperature adjustable or selectable versions, meaning that one product can transition between all three colour temperatures.

WARM WHITE (WW)

3000K

NATURAL WHITE (NW)

**4000K**

DAYLIGHT (D)

6000K

IP ZONES EXPLAINED

A lot of VEW LED products are IP rated, meaning that they are suitable for use within the bathroom and in other areas of the home that may come into contact with water. It is important to understand IP ratings and IP zones to ensure safe installation of all electrical products.

Every bathroom has certain areas that are more at risk of being exposed to water than others. When installing bathroom lighting it is vital that you consult an IP zone map as shown below to identify the level of protection you require in each area.
N.B. SELV stands for separate extra low voltage.

ZONE 0
Inside the bath or shower. Any fittings used here must be SELV (max. 12v). A minimum rating of IPx7 is required here.

ZONE 1
Above the bath to a height of 2.25m. A minimum rating or IPx4 is required here.

ZONE 2
The area stretching to 0.6m outside the bath and above the bath if over 2.25m. An IP rating of at least IPx4 is required here.

IP RATINGS EXPLAINED

IP stands for ingress protection and IP ratings simply indicate an LED product's protection against the ingress of solids and liquids. Both digits in the rating indicates something different, see below graph for details:

IP65

No.	FIRST DIGIT: Protection against ingress of foreign bodies e.g. tools, dust, fingers, etc.	SECOND DIGIT: Protection against ingress of liquids i.e. IP44 is protection against solid objects greater than 1mm and water sprayed from all directions.
0	No protection	No protection
1	Protected against solid objects greater than 50mm (e.g. accidental touch by hands)	Protection against vertically falling drops of water (e.g. condensation)
2	Protected against solid objects up to 12mm (e.g. fingers)	Protection against direct sprays of water up to 15 degrees from vertical
3	Protected against solid objects greater than 2.5mm (e.g. tools and wires)	Protection against direct sprays of water up to 60 degrees from vertical
4	Protected against solid objects greater than 1mm (e.g. small tools and wires)	Protection against water sprayed from all directions – limited ingress permitted
5	Protected against dust, limited ingress (e.g. no harmful deposit)	Protected against low pressure jets of water from all directions – limited ingress permitted
6	Totally protected against dust	Protected against high pressure jets of water (use on ship deck) – limited ingress permitted
7		Protected against the effects of immersion between 15cm and 1m
8		Protected against long periods of immersion under pressure

This information is intended as a guide and contains several generalisations for illustrative purposes. For more technical information refer to an electrician and specific product data. All data is accurate at time of going to print and the company reserves the right to alter technical specifications at any time and without prior notification. Sizes are a guide only and all colours are subject to levels of accuracy determined by limitations of the printing process.

What does LED stand for?

LED stands for Light Emitting Diode.

What is a watt?

A watt is a unit of power used to quantify the rate of energy transfer from an LED product. It is equivalent to one joule per second. The calculation that is used to derive a watt is the voltage multiplied by the amperage. Basically it's a way to track how much energy a product consumes.

The symbol for wattage is: w, for example: 4.8w

What are lumens?

Lumens is the measurement of brightness that an LED product gives out as perceived by the human eye. It is important to consider the lumen output when purchasing an LED product as this will tell you just how bright the product is going to be.

The symbol for lumens is: lm, for example: 260lm

What is voltage?

Voltage is the pressure from an electrical circuit's power source that pushes charged electrons, or the current, through a conducting loop. This then illuminates an LED light. Most LED products have a voltage of 12 or 24.

The symbol for voltage is: v, for example: 12v

What is a kelvin?

Kelvin is a unit of measurement for the colour temperature of light. There is a Kelvin scale that is used to determine the temperature and shade of white that an LED light gives out. The higher the Kelvin, the cooler the light, the lower the Kelvin, the warmer the light.

What is a mA or mAmp?

mA or a milliamp is a unit of measurement for an electric current flowing through an electrical conductor and a measure of the rate of flow of electrons.

What is an IP rating?

IP ratings are an indication of an electrical product's protection against solid objects such as dust and dirt and moisture. IP stands for ingress protection. The IP rating consists of two digits, the first number refers to the product's protection against solids, the second refers to its protection against liquids.

For example: IP65 rated means a product is dust tight and protected against the ingress of dust, but is also protected against powerful jets of water.

What is RGB?

RGB simply stands for 'red, green and blue'. An RGB LED product has the ability to combine these three colours to produce over 16 million hues of coloured light.

What is CCT?

CCT stands for 'correlative colour temperature' which indicates the colour appearance of a white LED. Is it defined in Kelvins.

What are CCT switchable products?

When a product is CCT switchable, this means that it can be controlled to be 3000K warm white, 4000K natural white or 6000K daylight.

What are CCT adjustable products?

CCT adjustable products can be transitioned from 3000K warm white through to 6000K daylight or anything in between with the use of a remote control or a mobile device application.

What is CRI?

CRI stands for 'colour rendering index'. It is simply a measure of a light's ability to reveal the colours of various objects in comparison with a natural light source.

What is IR?

If a sensor is an IR sensor, this stands for infrared. This means that the sensor emits an infrared beam up to a certain distance away from itself that can detect motion. These can be used in 2 ways: as a door sensor or as a wave/swipe sensor.

What is PIR?

If a sensor is a PIR sensor, this stands for passive infrared, meaning that the sensor is activated when an object enters its field of view. It can also be called person in range, meaning that when a person or a moving object moves within the sensors detection range the lights will come on.

What is an SMD LED?

SMD, or 'Surface Mounted Diode' LED products contain a permanently fused LED chip on a printed circuit board. This is then enveloped in an epoxy resin.

Key features:

■ Good light output with low energy consumption

■ Wide beam angle for increased spread of light

■ Lower energy costs with a high level of performance

What is COB?

COB or "Chip on Board" technology contains a high number of diodes on the same surface, making it extremely bright but keeping the energy consumption very low. It also a high lumen-per-watt ration and heat efficiency.

Key features:

■ Very high light output with low energy consumption

■ Minimal heat output

■ Wide beam angle for increased spread of light

■ Highly diffused light

■ Long lifespan

What is 3M VHB?

3M VHB are a family of tapes with double-sided foam tapes made from high performance acrylic adhesives on the back of them. The superior performance of 3M VHB Tapes means they can often be used to replace mechanical fasteners for joining a wide range of materials. Kitchen, bedroom and bathroom furniture is often constructed using materials which are challenging for adhesives to work effectvely with. Solid stone worktops are constantly cold and offer very little surface energy whereas cabinetry can sometimes be left with sawdust and swarf which will cause adhesion failure with most LED tapes. At TLW, we have done extensive research to find the best adhesive backing for our VEW LED Tape and other products.

3M VHB is a pressure sensitive adhesive tape that is suitable for use on a wide variety of surfaces and is durable even in changing temperatures. Many of our clients have proven the benefit of this robust adhesive solution and enjoy the peace of mind its longevity brings. All VEW LED tapes use 3M VHB as standard.

What is KONNEX?

The KONNEX system is unique to TLW products and is a simple plug and play system that allows you install our lighting products more easily.

The key features of this system include:

■ Separate power lead for products which makes it easier to route power from the source straight to the fitting

■ Simple and easy to unplug the lead from the fitting if you'd like to change the light

■ Products have individual components which allows for easier troubleshooting

VEW LIGHTING

ve**w**tube™

We recognise that visualising lighting and the important processes involved in set up and installation can be imperative to our customers. That's why we have created the VEWtube channel. Here we are always uploading useful video content to assist with everything from understanding technical elements of lighting, to installation and setup guides. Go to YouTube and search VEWtube. Throughout this brochure you will find QR codes, simply scan them and it will direct you to relevant video content about that product or category.
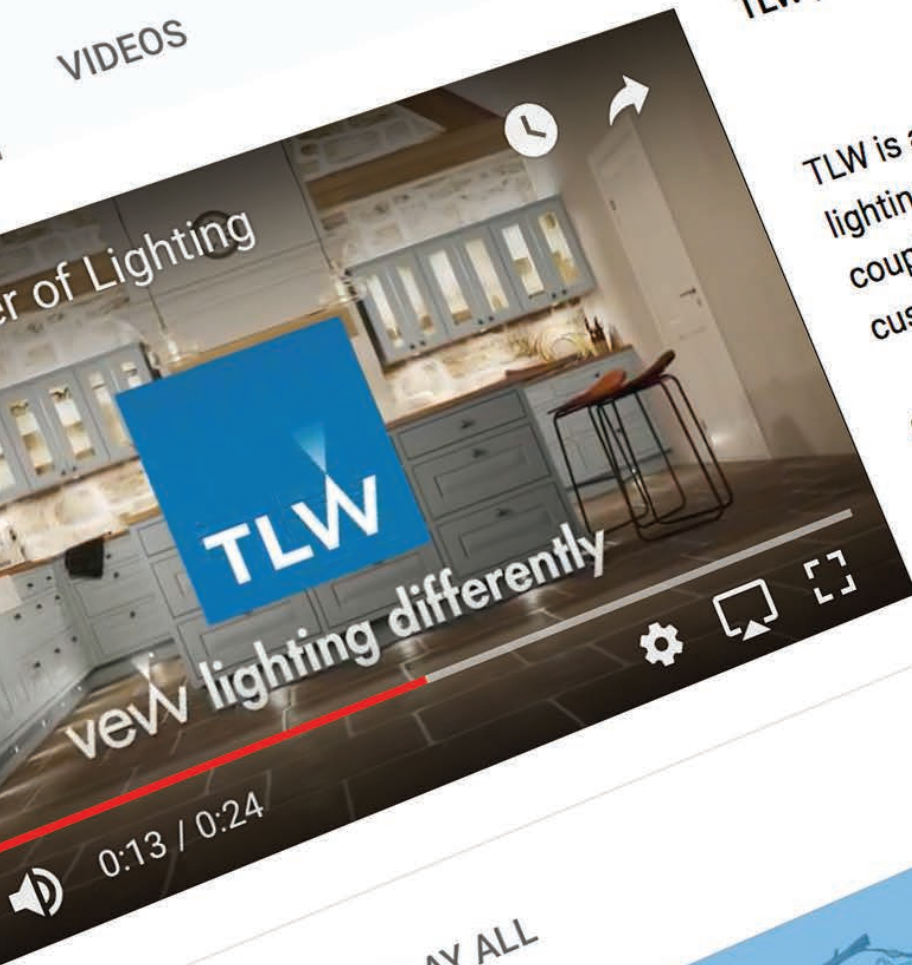

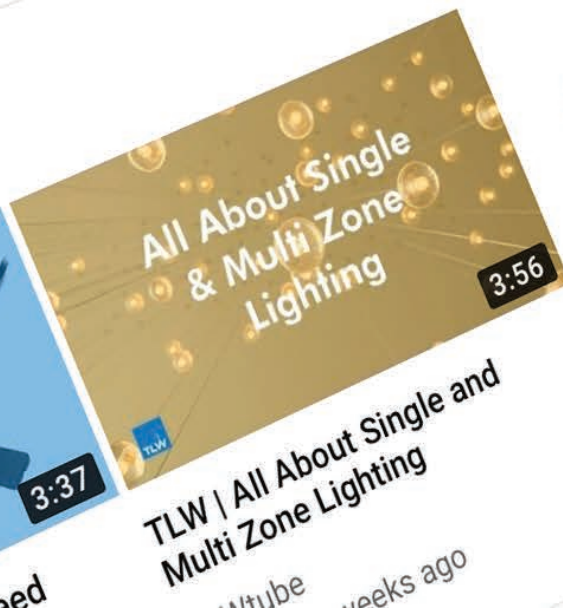

TLW | The Power of Lighting

TLW is a market-leading manufacturer and supplier of innovative lighting solutions. We specialise in high quality products, coupled with incomparable service and dedication to our customers.

Specific attention is given to the KBB and furniture areas but almost any lighting product can be competitively sourced,
