WIRED SENSOR RANGE

Product Overview

Bring convenience and style to your lighting installations with the TLW wired sensors. Designed for effortless integration into furniture and cabinetry, these compact sensors offer a sleek, discreet finish while providing reliable functionality. The Door Sensors and Motion Sensor models feature precise hand-sweep or touch activation, ideal for wardrobes, bathroom mirrors, and under-cabinet lighting. For larger spaces, the PIS Sensors delivers responsive control with up to a 3-metre sensing range. Easy to install in either recessed or surface-mounted applications, the sensors enhance modern lighting design with simplicity and efficiency.

Technical Specifications

Product Code	Description	Size	Cut Out	Sensing Distance
