

INSTALLATION GUIDE

Product Name: Bar Slim Rechargeable Bar Light

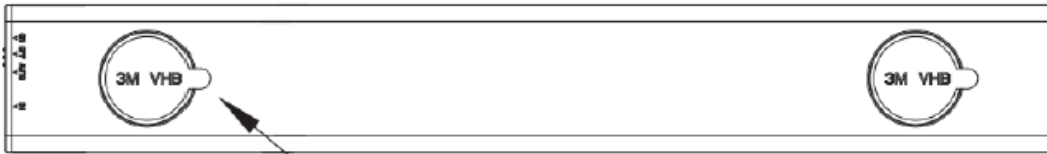

Product Code: C01-2045*

Installation

There are two methods of installation:

1. VHB adhesive plates

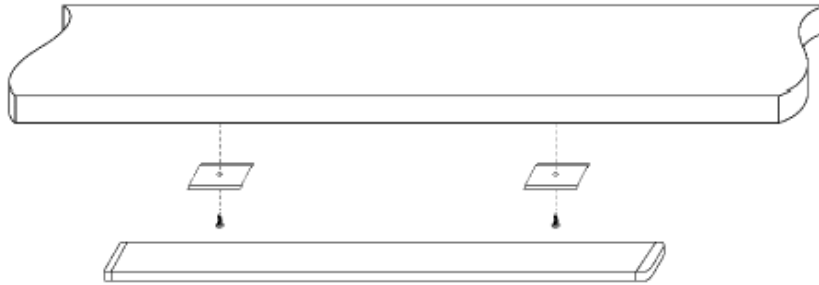

Please use this tab to remove the backing

1 Simply peel off the backing on the adhesive plates.

2 Apply them in the required location and attach the light.

2. Magnetic fixing plates and screws

1 Screw the fixing plates provided into the required location.

2 Move the light up to the fixing and it will be held in place

INSTALLATION GUIDE

Product Name: Bar Slim Rechargeable Bar Light

Product Code: C01-2045*

Instructions

1. When you set the switch on the end of the light to "ON", the light will remain permanently on.
2. When you set the switch on the end of the light to "OFF", the light will remain permanently off.
3. When you set the switch on the end of the light to 'auto' the sensor mode will be activated. When motion is detected the light will automatically switch on.
4. After no motion has been detected for 15 seconds the light will switch off.
5. The sensor has a detection range of 1-3 Meters.
6. The sensor's detection angle is 90 degrees.
7. When the luminaire is installed in the cabinet, the sensing distance is 1-2m.
8. When you charge the light the indicator will turn red. When fully charged the indicator light will turn green.
